## New Consumer Product Safety Laws in Canada and the United States: Business on the Border\*

Daniel L. Kiselbach & Charles E. Joern, Jr.\*\*

### 1. INTRODUCTION

Consumer product safety has received much attention in Canada and the United States over the past few years. Public reaction to high-profile recalls involving unsafe imported goods has led to the introductions of new laws and policies to protect the public in both Canada and the United States. These new laws have a significant effect on companies doing business on each side of the North American border.

The purpose of this article is to provide an overview of the new Canada Consumer Product Safety Act (CCPSA; hereinafter the 'Act') and the recently revised (United States) Consumer Product Safety Improvement Act (CPSIA). This article will provide essential information about these consumer product safety laws for companies selling products into Canada and the United States.

### 2. CANADA

#### 2.1. Purpose and Legislative Scheme

A number of high-profile consumer product safety issues have led to the enactment of new consumer product safety legislation in Canada. On 20 June 2011, the Act came into force. Health Canada is responsible for the administration and enforcement of the Act, which sets out a comprehensive consumer product safety regime. This article provides essential information about the Act for manufacturers, distributors, importers, and retailers who supply consumer products in Canada.

The Act is similar to US consumer product safety legislation. It is designed to protect the public by addressing or preventing dangers to health or safety posed by consumer products imported to or produced within Canada.<sup>1</sup> The Act:

- Prohibits certain activities such as the manufacture, importation, advertisement, and sale of unsafe consumer products.
- Provides for incident reporting, safety measures, recalls, and other related matters.
- Establishes significant civil and criminal penalties for non-compliance.

#### 2.2. Prohibitions

The Act prohibits the manufacture, sale, importation, or advertisement of listed products or products that fail to meet regulatory requirements.<sup>2</sup> Listed products have been deemed to pose a significant risk to consumers (such as baby bottles containing bisphenol A). The Act prohibits the manufacture, sale, importation, or advertisement of products that are:<sup>3</sup>

- A danger to human health or safety.
- Subject to a recall order or a voluntary recall.
- Subject to a measure or order imposed under the Act that has not been complied with.

The Act prohibits misleading labelling or packaging respecting a product's danger or safety certification.<sup>4</sup>

1 Canada Consumer Product Safety Act (CCPSA), S.C. 2010, c. 21, s. 3.

2 *Ibid.*, ss 5 and 6 and Sch. 2.

3 *Ibid.*, ss 7 and 8.

4 *Ibid.*, ss 9 and 10.

### 2.3. Recordkeeping

New document and recordkeeping requirements include the following:

- Persons may be ordered to test products and provide test results to the Minister.<sup>5</sup>
- Any person who sells, manufactures, imports, advertises, or tests a consumer product for commercial purposes is responsible for preparing and maintaining documents:
  - (a) in the case of retailers, that indicate the name and address of the person from whom they obtained the product and the location where and the period during which they sold the product; and<sup>6</sup>
  - (b) in the case of any other person, the name and address of the person from whom they obtained the product and to whom they sold it (as applicable).<sup>7</sup>
- Documents must be retained for six years.<sup>8</sup>

### 2.4. Incident Reports

A person who manufactures, imports, or sells a consumer product in Canada and receives information respecting an event must provide information when they are aware that an incident that is related to a consumer product that they supply in Canada has occurred.<sup>9</sup> The Act defines an ‘incident’ as:

- an occurrence in Canada or elsewhere that resulted or may reasonably have been expected to result in a death or in serious adverse health effects;
- a defect or characteristic that may reasonably be expected to result in a death or serious adverse health effects on their health;
- incorrect or insufficient information on a label or in instructions – or the lack of a label or instructions – that may reasonably be expected to result in a death or serious adverse health effects; or

- a recall or measure that is initiated for human health or safety reasons by a foreign entity, specified government, public body, or institution.<sup>10</sup>

Health Canada has listed three questions that are designed to help determine whether an event is a reportable incident:

- Does the event relate to a consumer product that I sell, manufacture, or import in Canada for commercial purposes (including its components or accessories or packaging)?
- Does it meet the criteria of an incident in any of paragraphs 14(1)(a) to (d) of the Act?
- Does it indicate an unreasonable hazard posed by the normal or foreseeable use of the product or the foreseeable misuse of the product?<sup>11</sup>

### 2.5. Reporting Deadlines

A manufacturer, importer, or retailer who becomes aware of an incident must provide information to the Minister and, if applicable, the person from whom they received the product, within two days after the day on which they became aware of the incident.<sup>12</sup> A manufacturer, importer, or retailer must provide a written report to the Minister within ten days after the day on which they become aware of the incident. The report must include information about the incident, the product, products that could be involved in a similar incident, and measures that have been taken or proposed in respect of those products.<sup>13</sup>

### 2.6. Recalls

The Minister can recall a consumer product if the Minister believes, on reasonable grounds, that it poses a danger to health or safety.<sup>14</sup> The Minister can also impose measures to stop manufacturing, importing, packaging, storing, advertising, selling, labelling, or

7 *Ibid.*, 4; heading ‘3.1.2 In the Case of a Manufacturer, Importer, Advertiser, Seller or Tester’, and s. 13(1)(a)(ii) of the Act.

8 CCPSA, *supra* n. 1, subs. 13(1).

9 Health Canada, Guidance on Mandatory Incident Reporting under the Canada Consumer Product Safety Act – s. 14, Duties in the Event of an Incident (‘Reporting Guidance’), 3–4, heading ‘3 Key Features’.

10 *Ibid.*, s. 14(1).

11 Reporting Guidance, *supra* n. 10, 5, heading ‘5. Determination of an “incident”’.

12 *Ibid.*, 6, heading ‘5.4 Provision of incident information’.

13 *Ibid.*, 7.

14 The Act, *supra* n. 1, s. 31.

transporting the product if it is subject to a recall or a person has not complied with the Act or a previous order.<sup>15</sup> The Minister may apply for an injunction ordering a person to refrain from doing anything that would result in a commission of an offence.<sup>16</sup>

## 2.7. Information Disclosure

The Minister may disclose personal information or confidential business information without consent in some situations, particularly where disclosure is necessary to address a serious and imminent danger.<sup>17</sup>

## 2.8. Enforcement and Penalties

The Act is enforced by inspectors.<sup>18</sup> Inspectors have broad search and seizure powers under the Act. They may enter any place or conveyance where consumer products or related documents are stored, manufactured, sold, imported, packaged, advertised, labelled, tested, or transported.<sup>19</sup> Consent or a warrant is not required to enter a place other than a dwelling house.<sup>20</sup> Inspectors have powers to seize, photograph, open, move, test, and examine items.

In general, it is an offence to contravene the Act.<sup>21</sup> Criminal sentences for the most serious offences may include a fine of up to CDN 5 million and imprisonment of up to two years. If a corporation commits an offence, its directors, officers, and agents are deemed to be parties to the offence and are liable to punishment.<sup>22</sup> Due diligence is a defence.<sup>23</sup> A person who contravenes the Minister's order<sup>24</sup> may be subject to an administrative monetary penalty system (AMPS).<sup>25</sup> Due diligence is not a defence for AMPS.<sup>26</sup> The maximum penalty is

CDN 5,000 for non-profit organizations – or by any other persons for non-commercial purposes – and CDN 25,000 in any other case.<sup>27</sup>

A person may ask to enter into a compliance agreement with the Minister as an alternative to paying a civil penalty. The purpose of a compliance agreement is to ensure that a person invests in compliance and avoids future non-compliance.<sup>28</sup> A compliance agreement may contain various conditions, including a requirement to give security as a compliance guarantee.<sup>29</sup>

## 3. UNITED STATES

### 3.1. Purpose and Legislative Scheme

In August 2008, the CPSIA<sup>30</sup> became law in the United States. It revises and enlarges the original 1972 Consumer Product Safety Act (the 'CPSA').<sup>31</sup> The CPSIA expands both the authority and the resources of the Consumer Product Safety Commission (the 'Commission') – the federal agency charged with protecting the American public from unreasonable risks of harm involving consumer products.<sup>32</sup>

The CPSIA regulates the manufacture, importation, distribution, and sale of consumer products in the United States. It affects companies of any size that manufacture, import, or export consumer products. The CPSIA focuses on children's products but governs all consumer products through a complex system of rules and regulations.<sup>33</sup>

The CPSIA amends the 1972 CPSA in several important ways:

- It expands the scope of specifically regulated products.

24 Contravening the recall orders and orders to take certain measures can result in a violation. See ss 31, 32, and 35.

25 The Act, *supra* n. 2, s. 49.

26 *Ibid.*, s. 59.

27 *Ibid.*, s. 50(2).

28 *Ibid.*, s. 53(2)(a).

29 *Ibid.*, s. 54(1).

30 Pub. L. No. 110-314, 122 Stat. 3016 (2008).

31 15 U.S.C. ss 2051–2089.

32 'Consumer products' are basically defined in the CPSA as any article or component part that is produced or distributed for sale to a consumer for use in or around a household, residence, school, or in recreation. Consumer products do not include products regulated under other federal statutes such as: tobacco products, motor vehicles or motor vehicle equipment, pesticides, firearms, and ammunition, aircraft, boats, drugs, medical devices, cosmetics, or food. 15 U.S.C. s. 2052(a)(5).

33 The United States consumer product safety rules and regulations are still evolving. The Commission is currently in the process of several important rulemakings and guidance. This article is current as of its writing in September 2011.

- It broadly defines children’s products<sup>34</sup> and subjects them to strict lead and chemical content limits.
- It requires certification of compliance through stringent pre-sale testing.
- It significantly increases civil and criminal penalties for non-compliance.
- It modifies import and export rules.
- It expands self-reporting and recall provisions.

In August 2011, H.R. 2715 became law and modified portions of the CPSIA. This new legislation gives the Commission authority and discretion in how it may enforce the provisions of the CPSIA.<sup>35</sup> H.R. 2715 retains the core portions of the CPSIA, such as mandatory testing-based certification and the public consumer complaint database, but modifies certain burdensome and costly CPSIA rules. The legislation exempts specific products and groups from lead content and third-party testing requirements but also allows the Commission options to give businesses relief generally from CPSIA mandates.

### 3.2. Prohibitions

Businesses have varying obligations under the CPSIA, but generally they must comply, test, certify, and report. Failure to do so is a prohibited act. No person or entity may:

sell, offer for sale, manufacture for sale, distribute in commerce, or import into the United States any consumer product . . . [that violates any] applicable consumer product safety rule under [the Consumer Product Safety Act], or any similar rule, regulation, standard, or ban under any other Act enforced by the Commission.<sup>36</sup>

Other ‘prohibited acts’ include the sale, and so on, of a:

- product that has been recalled;
- defective product that contains a ‘substantial product hazard’; or
- product that contains a ‘banned hazardous substance’.

‘Prohibited acts’ further include:

- failure to report non-compliant products;
- failure to issue required certificates of testing compliance;
- failure to provide or maintain required records or information; or
- exportation from the United States of non-compliant consumer products.<sup>37</sup>

### 3.3. Product Testing and Certification

Product testing to ensure regulatory compliance is a key principal of the CPSIA. Consumer products must be certified as compliant with specific product safety rules.<sup>38</sup>

- Domestic manufacturers and importers are required to provide certification that the product has been properly tested and complies with all applicable rules, regulations, standards, and bans.<sup>39</sup>
- Certificates of compliance must accompany the product and be furnished to each distributor or retailer of the product.<sup>40</sup>
- Products that do not have required certificates may not be imported into the United States or move in commerce within the United States.<sup>41</sup>
- Children’s products must be certified using independent testing by an authorized third-party testing laboratory.<sup>42</sup>
- Domestic manufacturers and importers of non-children’s products, subject to specific product safety rules, must provide a ‘General Conformity Certification’, based on a test of each product or a ‘reasonable testing program’.<sup>43</sup>

### 3.4. Recordkeeping

The CPSIA also regulates and expands recordkeeping requirements imposed on businesses in the product

#### Notes

- 34 The CPSIA defines a ‘Children’s Product’ as a consumer product designed or intended primarily for children 12 years of age or younger. 15 U.S.C. s. 2052(a)(2).
- 35 Pub. L. No. 112-28, 125 Stat. 273 (2011).
- 36 15 U.S.C. s. 2068 et seq.
- 37 *Ibid.*
- 38 15 U.S.C. s. 2063 et seq.
- 39 16 C.F.R s.1110.7.
- 40 15 U.S.C. s. 2063(g)(3).
- 41 15 U.S.C. s. 2068(a)(6).
- 42 15 U.S.C. s. 2063(a)(2).
- 43 15 U.S.C. s. 2063(a)(1)(A).

supply chain. These include, among others, the following requirements:

- Upon request from the Commission, every importer, retailer, or distributor of a consumer product must provide essential information on the manufacturer of the product.<sup>44</sup>
- Manufacturers, upon Commission request, must identify each retailer or distributor to which the manufacturer directly supplied a consumer product as well as each subcontractor involved in the production of the product or from which the manufacturer obtained a component.<sup>45</sup>
- Manufacturers of children’s products must permanently label their products and packaging with information that will enable the manufacturer to identify the location and date of the item’s production, including the batch, run number, or other identifying characteristics.<sup>46</sup> The purpose of the rule is to assist in the identification of a product that is recalled.

### 3.5. Reporting

Manufacturers, importers, distributors, and retailers are required to report to the Commission information that reasonably supports the conclusion that a product:

- does not comply with a product safety rule issued under the CPSA;
- does not comply with any other rule, regulation, standard, or ban under any Act enforced by the Commission;
- contains a defect that could create a ‘Substantial Product Hazard’; or
- creates an unreasonable risk of serious injury or death.<sup>47</sup>

Reports to the Commission must be filed ‘immediately’.<sup>48</sup> Applicable regulations allow fifteen business days to transmit information within a company and to investigate and evaluate whether the information requires a report to the Commission.<sup>49</sup> Failure to timely submit a reportable problem is a violation that can result in a civil penalty – irrespective of whether the product is ultimately recalled.

### 3.6. Recalls

While the vast majority of recalls are ‘voluntary recalls’ initiated by a business in conjunction with the Commission, the Commission has the authority to order recalls of consumer products. The CPSIA enhances the Commission’s mandatory recall powers. The Commission may now order a manufacturer, distributor, or retailer to cease distribution of a product, notify others to cease distribution, give public notice of the defect, or take other actions. The Commission can order these actions without a prior hearing if the Commission determines the product to be imminently hazardous or is required to protect the public from a substantial product hazard. The Commission must first notify the affected manufacturer and file an action in federal district court.<sup>50</sup>

### 3.7. Information Disclosure

The Commission may share information with any ‘Federal, State, local or foreign government agency’ if the agency:

- agrees to keep the material confidential and used only for official purposes;
- has a legal basis to maintain the material in confidence; and
- will use the materials for authorized purposes.<sup>51</sup>

The CPSIA also establishes a Publicly Available Consumer Product Safety Information Database (hereinafter the ‘Database’). The Database includes reports of harm relating to use of consumer products. Consumers, health-care professionals, and others may submit reports that are then published on the Database and are available through the Commission’s Internet website at <www.saferproducts.gov>. Manufacturers who are the subject of a report have a brief period of time to comment or object before the report is published.<sup>52</sup>

### 3.8. Enforcement and Penalties

The CPSIA significantly increases both civil and criminal penalties for violations of the law.

- The maximum civil penalty for individual violations increases from USD 8,000 to USD 100,000.<sup>53</sup>

#### Notes

- 44 15 U.S.C. s. 2065(c)(1).  
 45 15 U.S.C. s. 2065(c)(2).  
 46 15 U.S.C. s. 2063 (a)(5).  
 47 15 U.S.C. s. 2064(b).  
 48 *Ibid.*  
 49 16 C.F.R. s. 1115.14.  
 50 15 U.S.C. ss 2064(c) and (d).  
 51 15 U.S.C. s. 2078(f).  
 52 16 C.F.R. s.1102 et seq.  
 53 15 U.S.C. s. 2069.

- The ceiling on civil penalties for a related series of violations increases from USD 1.825 million to USD 15 million.<sup>54</sup>
- Criminal penalties for knowing and wilful violations increase from a maximum of one-year imprisonment to five years.<sup>55</sup>
- Criminal penalties now include forfeiture of assets associated with the violation.<sup>56</sup>

In addition to enforcement by the Commission, the CPSIA adds two other methods of enforcement:

- State attorneys general in all fifty states in the United States can enforce the CPSIA through civil litigation.<sup>57</sup>
- ‘Whistleblower’ protection is expanded to protect employees who report employer violations of the CPSIA.<sup>58</sup>

### 3.9. Import/Export Provisions

The CPSIA also has provisions that focus on import/export issues including:

- Non-compliant products refused admission into the United States shall be destroyed and not exported unless the owner, consignee, or importer of record receives permission from the Secretary of the Treasury to export the product in lieu of destruction.<sup>59</sup>
- The Commission may also prohibit the export from the United States of any non-compliant product unless the importing country gives the Commission appropriate notice of acceptance.<sup>60</sup>

## 4. SUMMARY

Companies that sell into Canada and the United States must be aware of the new and evolving consumer product safety laws in these countries. Affected businesses should take steps now to implement a compliance plan that addresses the complex laws of both Canada and the United States. The failure to do so can result in significant penalties and costly disruption of business.

## GUIDE TO AUTHORS

The following is a brief guide concerning the provision of articles which may be of assistance to authors.

1. Articles must be submitted in Microsoft Word-format, in their final form, in correct English. Please send the electronic file to the Editor by e-mail, at [jsnyder@crowell.com](mailto:jsnyder@crowell.com).
2. Special attention should be given to quotations, footnotes and references which should be accurate and complete. In the case of book references please provide the name of author, publisher, place and year of publication.
3. Tables should be self-explanatory and their content should not be repeated in the text. Do not tabulate unnecessarily. Keep column headings as brief as possible and avoid descriptive matter in narrow columns.
4. A brief biographical note, including both the current affiliation as well as the e-mail address of the author(s), should be provided in the first footnote of the manuscript.
5. Due to strict production schedules it is often not possible to amend texts after acceptance or send proofs to authors for correction.
6. Articles which are submitted for publication to the editor must not have been, nor be, submitted for publication elsewhere.
7. This article should contain an abstract, a short summary of about 100 words, placed at the beginning of the article. This abstract will also be added to the free search zone of the Kluwer Online database.
